

浮点干式漂浮床

以膜面隔开人体与水体，通过膜下水体的承托形成干式漂浮体验。体验者躺在膜面上，身体保持干燥。

交互与体验

产品资料采用 Android 与本地交互方案。实际控制项目、配套模块和体验程序按具体设备配置确认。

选型与交付

项目选型需核对场地、设备尺寸、承重、用电和维护条件。具体尺寸、重量、水量、温控范围与配套机组，以对应设备的技术协议和交付文件为准。

本页为产品基础介绍，用于初步沟通。正式使用与维护请遵照随设备交付的说明书。

Dry flotation bed

A membrane separates the user from the water below. The supporting water and membrane provide a dry flotation experience while the user remains dry.

Interaction and experience

Product records specify Android and local interaction. Available controls, modules and experience programmes are confirmed for each equipment configuration.

Selection and delivery

Project planning should confirm site conditions, equipment dimensions, loads, electrical supply and maintenance access. Dimensions, weight, water volume, temperature range and auxiliary units follow the technical agreement and delivery documents for the actual equipment.

This is introductory product information. Operation and maintenance follow the manual supplied with the equipment.
